- Benchmarking has clear potential as an effective approach to quality management within higher education, it is too early in its application to be able to form a clear view on whether this potential will be realised.
- The substantial improvements in both quality and performance achieved through the use of benchmarking by many private and public sectorinstitutions as a convincing case for the effectiveness of the approach.
- Comprehensive way within universities is less certain. It is evident that a large amount of interesting work is currently being undertaken, and much ofthis will need to be evaluated carefully before the benefits can compared to the significant amount of resources [especially time] that are involved.
